RE: Olin Corp./McIntosh Plant Superfund Site
McIntosh, Alabama - Revised Sampling and Analysis Plan

Dear Mr. Downey:

You should have received via federal express (April 3, 1992) a copy of the Revised Sampling and Analysis Plan (SAP) for the Phase II sampling effort at the Olin/McIntosh Site. If you have not received two copies of this document, please give me a call as soon as possible. I am sending a similar letter to Fred Harders in Commissioner Martin's office. I informed him that you will be transmitting him a copy of the document. I also transmitted the document to Danny Moore in Dr. Mancini's office. If there are any other offices that you feel need to be included in this review process, please let me know.

The Preliminary Site Characterization Summary (PSCS) Report is due in this office on April 16, 1992. Consequently, I am requesting specific comments on this document on or before April 23, 1992. This will give you an opportunity to review the sampling scheme that is proposed in the SAP as well as determine deficiencies that are reflected in the PSCS. These deficiencies (as they relate to data needs) can then be incorporated into the Revised SAP.

If you foresee a problem with meeting the requested deadline, please contact me at (404)347-2643 as soon as possible. Thanks for your cooperation in this matter.

Sincerely,

Cheryl W. Smith
Remedial Project Manager
South Superfund Remedial Branch
